Essential tool for imaging solutions

Solve applications quickly & easily

Before Filter

After MidOpt BP470 Blue Bandpass Filter

Increase Contrast and Improve Image Quality

BP470 increases contrast to enhance the batch code

<<

Excellent Resource

Evaluate and Improve Image Quality
Designed to assist vision integrators and end users to evaluate and improve image quality.

Test Before Investing in Hardware
Filters can determine type and color of lighting hardware which best satisfies the application requirements.

Control the Variability of Ambient Light
Once appropriate lighting has been chosen, a complimentary filter aids in correcting specific problems and in controlling the variability of ambient lighting conditions.

FS100 Includes:

- QR code to link filter specifications
- Larger size 43mm diameter filters
- Filter transmission curve
- Solve applications on site
- Portable
